

PHISHING ANALYSIS REPORT

Title: "Suspected Phishing URL — Shopee Impersonation — Medium"

Date: 22 June 2026

Analyst: Arunia Salsanur Fais

SUMMARY

A suspicious URL, `hxxps://shopee-tbk888[.]blogspot[.]com`, was identified through the PhishTank repository during a phishing investigation exercise. The URL was classified as a phishing website due to its impersonation of the Shopee brand through a deceptive Blogspot-hosted domain.

INDICATORS OF COMPROMISE

- Malicious URL: `hxxps://shopee-tbk888[.]blogspot[.]com`
- Domain: `shopee-tbk888[.]blogspot[.]com`
- IP Address: `2a00:1450:4001:c1f::84`
- DNS A Record: `142.251.20.132`
- Hosting Provider: Google LLC
- Hosting Platform: Blogger / Blogspot
- Page Title: Hadiah Shopee 2020
- VirusTotal Verdict: 19/92 vendors flagged as malicious
- URLScan Verdict: Potentially Malicious

HEADER ANALYSIS

Not applicable. The investigation was conducted using a phishing URL sourced from PhishTank rather than an email sample; therefore, email header artifacts such as SPF, DKIM, DMARC, sender address, and originating mail server were unavailable for analysis.

URL / ATTACHMENT ANALYSIS

VirusTotal detected the URL as malicious, with 19 out of 92 security vendors flagging it as phishing or malicious. Security vendors including Kaspersky, ESET, and Netcraft identified the URL as a phishing threat.

URLScan.io classified the website as Potentially Malicious. The analysis revealed that the site was hosted on the Blogger platform, displayed the page title "Hadiah Shopee 2020," and used Shopee branding and promotional content to attract potential victims. The site communicated with 7 IP addresses across 2 countries and generated 65 HTTP transactions during analysis.

The domain attempts to impersonate Shopee by embedding the brand name within a Blogspot subdomain rather than using an official Shopee-owned domain. This represents a brand impersonation technique commonly observed in phishing campaigns.

SOCIAL ENGINEERING TECHNIQUE

Reward, Familiarity, and Authority.

The phishing page promotes a prize giveaway ("Hadiah Shopee 2020") and displays images of prize handover events to entice user engagement. The site further exploits trust by impersonating the Shopee brand and presenting claims of approval by Kominfo, alongside partnership-related imagery, to create a false appearance of legitimacy.

RECOMMENDED ACTIONS

For Users:

- Do not interact with unsolicited prize or giveaway websites claiming to represent Shopee.
- Verify promotions through Shopee's official website and official social media channels before providing any personal information.
- Avoid entering credentials, personal data, or financial information on websites hosted on unofficial domains.
- Report suspicious websites impersonating trusted brands to the affected organization and relevant authorities.

For Organizations:

- Block the identified URL and associated indicators within web filtering and DNS security solutions.
- Submit the phishing site to Google/Blogger for review and takedown due to brand impersonation and phishing activity.
- Conduct security awareness training focused on recognizing phishing websites, brand impersonation, and social engineering techniques involving rewards and fake endorsements.
- Monitor threat intelligence feeds for similar phishing campaigns targeting Shopee users and other e-commerce platforms.
